

Fenny Compton Neighbourhood Plan Gazetteer of Heritage Assets

Introduction

This document draws together the known archaeology and heritage assets (both designated and undesignated) within the Parish of Fenny Compton area. It has been compiled as a supporting document for Fenny Compton's Neighbourhood Plan.

The objective of this desk-based assessment is to bring together as comprehensive as possible a range of records relating to historic and archaeological assets within the Parish of Fenny Compton. It uses written, oral, cartographic and photographic sources. The list of assets will be analysed during the production of Fenny Compton's Neighbourhood Plan to provide a view of the volume, location, complexity and potential for risk to such assets.

The research for the gazetteer was undertaken in 2017 and 2018 by Helen Wickenden and John Wickenden. A list of sources is show in the Appendix.

Fenny Compton Lodge

Designation **Grade: II**

Location grid reference SP 4157751924
Historic Environment Record reference N/A
NHLE reference 1355512

Type of asset

Site type House
Building type Dwelling-house

Age

Century C19
Time period Imperial

Asset description

House. Early C19, with mid C19 rear wing. Ironstone ashlar. Slate hipped roof with moulded plaster eaves cornice; rendered ridge and end stacks. L-plan, with wing on left to rear. Late Georgian style. 2 storeys; 4-window range. Panelled door of 2 vertical panels and overlight with decorative glazing. Doorcase of thin Tuscan columns and entablature. Sashes have stone lintels with flush keystones. Irregular left return side has canted bay. On right return side irregular rear wing fronts directly on to The Slade. Small Gothic stone triangular oriel with arched lights and leaf corbel. Interior: two good early C19 marble fireplaces. Straight flight staircase has moulded string

Gredenton Hill Camp

Designation **Scheduled ancient monument**

Location grid reference SP 4079251653

Historic Environment Record reference 669

NHLE reference 1005762

Type of asset

Site type Hillfort, Rampart

Building type Other

Age

Century C0

Time period Iron Age

Asset description

The site of a possible hillfort which dates to the Iron Age. The earthworks of the ramparts are visible on aerial photographs and it is located 1km south west of Fenny Compton. One of the spurs of the Burton Dassett hills, called Gredenton Hill, has its steep sides scarped into a series of artificial terraces. These terraces have every appearance of being the remains of ancient entrenchments which once encircled the summit of the hill, and which have been reduced by weather and the action of the plough to their present condition. The top of the hill is in a strong and commanding position and two little streams that run at the bottom of valley cuts on either side of the site probably once added to its natural defences.

A camp following the outline of the flat top of the hill, with lynchets down the slopes of the NW and SE sides. The SW side has been much disturbed by quarrying operations.

The air photographs are most impressive, but on the ground it is evident that the whole pattern is due to a combination of ridge and furrow, plough headlands, quarrying and soil-creep: and that there was never a hillfort.

Two flat terraces circumvate the hill on the E and N sides, but peter out on the other sides of the hill. Some strips of richer grass may indicate the location of ditches. There may originally have been as many as 5 ramparts, but all have now been heavily denuded. There are traces of ridge and furrow on the slopes and even the top of the hill.

If this was a hillfort it appears likely that it was bivallate. On balance it seems probable that it is a hillfort.

The alleged Iron Age hillfort. The earthworks present (and still visible on recent aerial photographs) are now thought to be the result of natural geology and topography as well as plough headlands, ridge and furrow, quarrying and soil creep. The ridge and furrow across the site was mapped as part of the SE Warwickshire and Cotswolds HLS Target Areas NMP.

It is not possible to tell whether this site was a hillfort without excavation. The ridge and furrow has caused huge terracing around three sides which obscure any rampart or ditches and the fourth side is destroyed by quarrying. There are also two areas of quarrying inside the possible circuit. However, over three quarters of the possible interior survives (under ridge and furrow). A Google Earth image

(1999) suggests that a bank, beneath the ridge and furrow, cuts the area approximately in half. It is plausible that this is the actual SW rampart of the possible fort.

Mid C17; alterations and additions mid/late C19; stable dated 1829. Ashlar and regular coursed ironstone. Tile roof has coped gable parapets and moulded kneelers; stone ridge and end stacks with string courses and cornices. T-plan, with cross wing on right. 2 storeys; 8-window range. Entrance in central symmetrical 5-window range has doorway with chamfered jambs. Hood mould, stepped up in centre over rounded sunk panel possibly a datestone but now illegible. C19 part-glazed 6-panelled door. Mid/late C19 tile hood with wooden struts interrupting hood mould. C19 three-light stone-mullioned and transomed window and to left and right. First floor and right wing have 2-light stone-mullioned windows. Hood moulds throughout; wing has hood mould continued across wall between ground floor windows. 2-window right wing projects only slightly. Steep gable with cross vent. Mid/late C19 one-window range on left, of rougher stonework. Ground floor has 2 windows with chamfered jambs. First floor has 3-light casement. Left return side has stable door with segmental arch. Right return side of wing: 2-window range. 2-light mullions. Rear irregular. Interior not inspected.

FENNY COMPTON CHURCH STREET SP4052 (South side) 6/48 Church of St. Peter and St. 30/05/67 Clare (Formerly listed as Church of St. Clare) Church. Late C13/early C14 chancel, largely rebuilt late C18/C19 and late C19; late C13 nave; late C14 north aisle, west tower and spire, and porch. C16 clerestory. Porch partly remodelled 1675. South aisle, restoration and tracery largely renewed 1879 by T.G. Jackson. Ironstone: chancel, clerestory, north aisle and tower regular coursed; south aisle of coursed rubble. Lead roofs have moulded parapets and shallow-pitched gable parapets. Chancel, aisled nave, north porch and west tower. Decorated style. 3-bay chancel, 3-bay nave. Chancel has plinth, double-stepped to east, and south diagonal and north-east buttresses; aisles have diagonal buttresses. Chancel has 3-light east window with reticulated tracery and hood mould. North side has blocked doorway partly inserted into it. Three 2-light south windows have cinquefoiled lights. North porch has low diagonal buttresses. C14 moulded arched doorway has hood mould with block stops, and C17 double-leaf plank doors. Datestone in gable. Late C14 north doorway of 2 sunk-chamfered orders has hood mould with head stops. Ancient studded 3-plank door. Two north windows of 2 trefoiled round arched lights in square head with moulded jambs and hood mould. 3-light east window has segmental arch and trefoiled lights. 2-light west window has simple cusped reticulated tracery. Hood moulds with block stops. South aisle has 4 buttresses. Central south doorway of 2 chamfered orders with hood mould and foliage stops. Four 2-light south windows have cusped Y-tracery. East and west windows similar to north aisle. 3-bay clerestory has 2-light windows; C16 with 4-centred lights to north, C19 with trefoiled lights to south. Tower of 2 stages. Double chamfered plinth. West diagonal buttresses have 4 offsets up to parapet. Blocked west door. Late C14 west window of 2 orders, with cinquefoiled reticulated tracery and hood mould with head stops. Similar trefoiled bell openings, but with return stops. North and south gargoyles. Recessed octagonal spire with small lucarnes. Interior: plastered walls. Chancel has C19 south recess with segmental-pointed arch. C19 roof, with one reset medieval head corbel. C14 chancel arch of 2 chamfered orders, the inner on half-octagon shafts with moulded capitals and bases, and hood mould with return stops. Nave has 5-bay C14 north arcade of 2 chamfered orders and octagonal pillars with moulded capitals and bases; easternmost bay has fragmentary foliage carving. Blocked square headed doorway to

former roof loft. Similar south arcade of 1879. Low-pitched roof has simply-moulded cambered tie beams with wall posts on stone corbels. Aisles have chamfered cambered tie beams and chamfered rib. Fittings: C17 communion rails with twisted balusters. Font has C19 bowl on old cylindrical stem and square base. Pulpit of 5 late C17 fielded panels. North aisle has plain locker with fielded panel door and H-hinges. C17 chest. Stained glass: north aisle east window c.1883. Monuments: chancel has reset brass with inscription to Richard Willis 1597. Elizabeth Croker 1719: wall monument with flaming urn. (V.C.H.: Warwickshire, Vol.I, pp.48-9; Buildings of England: Warwickshire, p.293).

NHLE reference 0

Type of asset

Site type Moat
Building type Other

Age

Century NK
Time period Medieval Post-Medieval

Asset description

The site of a possible moat, a wide ditch usually surrounding a building. There is only circumstantial evidence for its existence. It would have been Medieval and associated with the Manor House 250m north of the church at Fenny Compton. 1 A long pool in the grounds of Manor Farm is said to be the remains of a moat.

2 The pool is said by the resident of the house to be part of a moat which formerly surrounded the house. There is no other evidence to suggest this.

Type of asset

Site type Pottery Kiln, Kiln

Building type Other

Age

Century NK

Time period Romano-British

Asset description

Documentary evidence, together with concentrations of pottery debris on the ground, suggest that there was a Roman kiln in this area, 1km south east of Fenny Compton. 1 Much pottery (Samian, pelves, grey-blue common ware, etc) was found in 1881 in draining the 'Great Grounds', a field about half a mile S of the village on the lane to Farnborough fields; some pieces resembled wasters from a kiln.

2 Local enquiries failed to locate Great Ground.

3 The name Great Ground has now disappeared, but it has been suggested that the two large fields called Home Ground were once called Great Ground. The fields were walked after they were ploughed. An extensive scatter of stone and pottery was recorded at SP425. These were sherds of Roman grey ware, tile and Late and Post Medieval pottery (PRN 6168). It seems probable that the Romano-British site is not far away.

4 Reference

3 records the VCH as mentioning a tile kiln, but I can find no trace of a mention of anything other than a pottery kiln.

Historic Environment Record reference 666

NHLE reference 0

Type of asset

Site type Windmill, Mill

Building type Other

Age

Century C17

Time period Post-Medieval Imperial

Asset description

Documentary evidence suggests that this is the site of one or possibly two windmills first mentioned in 1655 and shown on the Ordnance Survey map of 1834. The site is located on Mill Hill. 1

Immediately E of the church, and 33m above it, a windmill occupies what was no doubt the site of the windmill mentioned in 1655 as attached to the manor.

2 Two windmills are marked on an estate map of 1787, they are close to each other. Only one mill is shown on Beighton's map of 1725 and the OS 1834 edition. The mill was blown down in 1895.

Type of asset

Site type Shrunken Village, Ditch, House Platform, Ridge And Furrow

Building type Other

Age

Century NK

Time period Medieval

Asset description

The site of a possible shrunken village dating to the Medieval period. The remains of several holloways are visible as earthworks. A Post Medieval house also existed on the site. It is located 400m south east of Fenny Compton. 1 Earthworks are visible in Hall Yard, Middle Field and Ladbrook Meadow. In Hall Yard, they are overlain by later landscaping. Definite holloways can be traced, but that in Ladbrook Meadow appears to cut through ridge and furrow. There is an unusual circular mound in Middle Field which is about 4m in diameter, surrounded by a circular ditch 10m in diameter. It was thought that this might have been a horse-mill.

Time period Medieval

Asset description

The possible site of an area a shrunken village dating to the Medieval period. There are earthworks of ditches, house platforms and ridge and furrow which are visible on the ground and on aerial photographs. It is located 400m north of the church, Fenny Compton. The Manor House is fairly remote from the village centre, and is surrounded by pasture fields, which show vague and indefinite earthworks. Two footpaths cross Wardens Close, SE of the manor and here there are some mounds and a well marked ditch. The ditch continues in a W direction into New Meadow, which appears to have been partially levelled, but some features remain. Further W again in Home Ground (Towne Furlong 1778) are several very pronounced platforms with dividing ditches, terminating in this field. There are other vague features to the N of the Manor House which are terminated by ridge and furrow.

2 Air photo evidence suggests two building plots lie in an area of medieval settlement remains. An archaeological evaluation revealed the wall of a medieval house (12th-15th century) fronting Northend Road, in the western plot. A small quantity of building rubble, badly disturbed by garden activity, was found in the eastern plot.

NHLE reference 0

Type of asset

Site type Canal, Aqueduct, Canal Tunnel
Building type Other

Age

Century C18
Time period Imperial

Asset description

A former long canal tunnel later opened up into a large cutting dating to the 18th and 19th century. It is situated 270m north of Lords Farm. 1 The tunnel was 1,138 yards long, 12' high and 9' wide. There were wooden blocks with rings every 12' on both sides and every so often passing points 16' wide. The building of this walled underground canal took the usual form. After the lay of the land had been studied, shafts were sunk for the full width of the canal until the base line was reached. Then they were worked in a horizontal direction until meeting. The tunnel, however, was a source of delay, but in 1838 the opportunity arose to purchase part of the land over the tunnel. Over the next two years £3964 was spent opening up part of the tunnel at both ends and in the middle, leaving two detached sections of 336 yards and 452 yards. Finally in 1865 the company started opening up the rest, the work being completed in 1870. The work necessitated the building of an aquaduct to carry the feeder from Wormleighton reservoir across the southern section. This was a rectangular, open-topped wrought iron channel on brick piers.

2 Fenny Compton was among the 20 longest canal tunnels in Britain. Started and completed in the construction period of Brindley's old Harecastle tunnel (1766-77), the first intermediate long-length canal tunnel in the world and built before the canal mania of 1792-4.

Age

Century C19
Time period Imperial

Asset description

Documentary evidence suggests that this the site of a kiln used for making bricks during the Imperial period. The site is east of the tunnel, 1.8km east of Fenny Compton. 19th century brick kiln adjacent to the canal. Warwickshire Industrial Archaeology Society have carried out extensive documentary research.

2 A brickyard was built here to exploit the clay produced by the building of the Fenny Compton Tunnel (PRN4371). A kiln was built in 1840-1 and continued production until 1917. The remains of the kiln are extant.

3 Images received from WIAS, via John Brace.

4 One of several places where the Oxford canal Company manufactured bricks, pipes etc. for both their own use and for sale to others. This works is special for it reused the clay spoil from the adjacent cutting. The first record of brick making here is from 1829 with the present kiln dating from 1841. By 1915 the clay spoil from the cutting was almost exhausted and the works closed soon after. It apparently re opened as the Tunnel Brick and Tile Works some time later but very little is known of this venture. The principal remaining feature is the Intermittent Downdraft kiln (13x6x3½m high) which was cleaned and recorded by the Warwickshire Industrial Archaeology Society in the decade from 1990. Also to be found is an incline leading to the canal towpath and worked by a small hand winch. Presently (2013) an attempt is being made, by the 'Fenny Compton kiln Preservation Trust', to restore/preserve the kiln.

Type of asset

Site type Settlement
Building type Other

Age

Century C14
Time period Medieval Post-Medieval

Asset description

Archaeological excavation revealed household rubbish and a spread of pottery dating from the Medieval and Post Medieval periods which may indicate a settlement. It is located 350m north of the church in Fenny Compton. An evaluation was carried out at this site by the OAU. A low density of features associated with a small amount of domestic rubbish mainly of 13th-14th century date was encountered in the northern corner of the area examined. The site lay outside the main part of the Medieval village.

2 Archaeological observation of topsoil stripping revealed a scatter of 13th-15th century pottery from the topsoil in the northern part of the site and a small amount of Post Medieval pottery. A spread of ironstone rubble was also noted.

Designation Not listed

Location grid reference SP 41 52
Historic Environment Record reference 7458
NHLE reference 0

Type of asset

Site type Settlement, Structure
Building type Other

Age

Century NK
Time period Medieval Imperial

Asset description

Archaeological investigation revealed evidence of settlement dating to the Late Medieval to Imperial period and included a stone built structure, a ditch, pottery and a penny. It is located 100m west of the church, Fenny Compton. Watching Brief and Evaluation carried out by OAU, in advance of the construction of new dwelling. An evaluation trench was excavated in November 1995 which revealed a stone-built Victorian structure, perhaps a property division, and a Victorian ditch. Victorian pottery and a Victorian penny (1868) were also recovered. No traces of Medieval remains were observed.

2 Evaluation of land adjacent to Church Street. No Medieval features were located, although Medieval pottery of mixed date was recovered from two of the earliest deposits in the trench. The two deposits probably represent late Medieval ploughing.

3 Further watching brief at land adjacent to Church Street noted late Medieval features, perhaps relating to the corner of a structure facing onto Church Street.

4 WMA summary of watching brief discovery of Medieval features.

Type of asset

Site type Settlement, House, Yard
Building type Other

Age

Century NK
Time period Medieval

Asset description

An archaeological investigation uncovered evidence of settlement dating to the Medieval period. Two houses, yards and pottery were found. The site is situated 400m north of the church, Fenny Compton. An evaluation (1994) of two proposed building plots on the north side of the Northend Road was carried out. Remains of a house, associated with 12th to 15th century pottery, were located.

2 The archaeological evaluation carried out in 1994 comprised a single trench in each of two proposed building plots. The trench in the western plot located a wall of the Medieval building. The more easterly the eastern plot found a small quantity of building rubble but had otherwise been disturbed by modern gardening activity.

3 Subsequent archaeological excavation of the area within the footings of the new houses revealed further evidence for Medieval settlement remains. Although the evaluation of 1994 located Medieval remains only on the western plot the excavation revealed Medieval buildings on both, and it was in the eastern plot that the remains were the best preserved. The house in the western plot was built in the 12th-13th century and was occupied until the early-mid 14th century. The eastern house was built in the later 13th century and continued in use until the early 15th century. The relatively late date for the construction of each building suggests that site lies on the edge of the Medieval village in an area that was always peripheral. Fenny Compton was a thriving settlement by 1086 and these buildings are somewhat later.

Site type Settlement
Building type Other

Age

Century C11
Time period Medieval

Asset description

The probable extent of settlement at Fenny Compton during the Medieval period which has been identified on the Ordnance Survey map of 1886. The possible extent of the medieval settlement, based on the first edition OS 6" map of 1886, 46 SE.

2 The ridge and furrow plotting of the parish.

3 Domesday lists Fenny Compton in Hunsbury Hundred. The Phillimore ed gives a grid ref of 4152. Ref: 16.57 [Land of the Count of Meulan] in (Fenny) Compton 4 hides and 3 virgates of land. Gilbert holds from him. Land for 6 ploughs. In lordship 2 ploughs; 7 slaves; 8 villagers with a priest and 6 smallholders with 4 ploughs. Meadow 40 acres. The value was 60s; now £4. Aelfric held it freely before 1066. Ref: 17,58-59.[Land of Hugh of Grandmesnil] Aelmer holds 2 hides in (Fenny) Compton. Land for 2 ploughs. In lordship 1 1/2 ploughs; 4 slaves; 6 villagers and 2 smallholders with 1 1/2 ploughs. Meadow, 16 acres. The value was 20s, now 40s. Roger holds 3 hides and 1 virgate of land in the same village. Land for 6 ploughs. In lordship 2, with 1 slave. 8 villagers and 4 smallholders with 4 ploughs. Meadow, 34 acres. The value was 40s; now 50s. Ordric, Alwin and Wulfsi held it freely before 1066.

4 The 1886 map shows little lanes and irregular enclosed areas which suggest antiquity and organic growth. ridge and furrow plotting shows almost complete survival throughout the parish, except for the north and south. It encircles the village, and mostly abuts the settlement. There may have been gardens on the western side between the village and the ridge and furrow:- there seems to be the remains of a boundary hedge on the 1886 map.

5 The earthworks around the village of Fenny Compton are visible on aerial photographs and have been mapped as part of the SE Warwickshire and Cotswolds HLS NMP survey. Centred at SP 4176 5200 are the earthwork remains of a Hollow way (SP 41774 52029), fishponds and possible field boundaries and a possible house platforms (SP 4181 5216). A mound is also visible at SP 41787 52003 measuring about 9m in diameter, which has been suggested is the remains of a horse mill (Warwickshire HER No. MWA667). The rectangular fishpond, centred at SP 41721 51988 is believed to be post medieval in date and was part of the landscaping of the area (Warwickshire HER No. MWA6197), a further possible pond at SP 4166 5205 may be from landscaping or from a swollen

stream which goes under Dog's Lane. Further possible croft ditches are visible north of Memorial Road at SP 41776 5227, and south of Manor Farm at SP 41653 52524. Although undated, many of these earthworks indicate village shrinkage.

6 The HER polygon showing the possible limits of the whole medieval village have been considerably enlarge in line with NMP mapping but in particular in line with evidenc from Lidar

Bear and Ragged Staff signpost

Designation Not listed

Location grid reference 52.1644835, -1.3938411

Historic Environment Record reference N/A

NHLE reference 0

Type of asset

Site type Signpost

Building type Other

Age

Century C20

Time period Modern

Asset description

The sign was first set up in 1930 as the gift of Canon Savile of the Lodge, and was made entirely of wood by Mr Fred Heels. Eventually time and weather left their mark, and the sign became frail. In 1961 the Parish Council had a new sign post, as near as possible a replica. made by Mr Keith Parkes, a newcomer to the village. It reproduced the Warwickshire arms, and was set up here in the original place on the Village Green. The replica was blown down in a storm in March 2017 and re-erected in 2018 by Michael Bosman.
